

SuperGlassHandling™

At Preston Rentals, we offer nationwide hire of all types of glass suction cups and glass lifters with vacuum suction and lifting yoke, allowing you to carry out your glass suction and vacuum suction tasks safely and efficiently.

We can quickly adapt to your specific task. We are happy to combine the crane task, including both glass suction and transportation. Of course, we deliver on time and at competitive prices.

Vacuum yokes are also an efficient gripping equipment for tasks involving airtight items:

- Transport of glass
- Glass lifting and installation
- Lifting of sandwich panels
- Lifting of fibre concrete and balcony bases
- Other tasks involving glass suction and vacuum suction

Lifting and transport with vacuum suction

320 KG SPIDER SUCTION

This suction cup has 4 suction cups arranged in a square and has a lifting capacity of 320 kg. It can be supplied with a remote control.

The suction cup is particularly suitable for lifting windows with glazing bars in the middle. Additionally, extensions can be attached to the cups, allowing the suction cup to be moved away from the suction surface. This is an advantage when installing windows where the glass is set deep in the frame or in sliding doors where the window is offset.

The suction cup can also be fitted with cups for lifting sandwich panels. With extension arms, stability is increased when lifting larger items.

Remote Control system for WPG.

Adapter for Mullions and Other Obstructions.

320 KG REACH SUCTION

The glass lifter/reach suction x 4 for crane hook can lift up to 320 kg. This vacuum suction has 4 pieces of 11" suction cups in a row with a very low net weight of only 44 kg.

The reach suction is the perfect vacuum suction for narrow windows. The vacuum suction can both rotate and tilt manually.

This suction cup has detachable suction cups for increased flexibility and installation of very small windows/items.

135 KG 2 SUCTION CUP

This suction cup has 2 suction cups and a lifting capacity of 135 kg. The suction cup is particularly suitable for lifting small pieces of glass and windows.

600 / 800 / 1000 KG HOEFLON SUCTION

The Hoeflon Vacuum Suction is a multifunctional glass lifter of premium quality, with outstanding fit and finish at a highly competitive price.

Unique features:

- Compact base unit for glass with small dimensions
- A spider-shaped design with large spread providing greater ease of installation, speed, and safety with large glass
- Lightweight design

The standard version includes:

- Remote control
- Transport trolley
- Long lifting arm
- Short lifting arm
- Replaceable battery system including an extra battery
- Protective covers for suction cups
